

Senior Project Manager, Insurance

- **Leading Insurance Corporation**
- **Dynamic and Challenging Role**
- **Excellent Working Environment**

Our client is a leading insurance corporation with diversified range of protection and wealth management to individuals and corporate customers. They are now looking for an experienced professional to join their dynamic IT team.

The incumbent will report to the Senior Project Director.

Responsibilities:

- Managing and implement IT projects throughout its life cycle and ensure that projects are within timescale, scope, and quality.
- Liaise with senior management, contractors, consultants and project team members for delivering quality projects and services
- Prepare proposals, analytical reports, presentations and other documentations as necessary throughout the project delivery

Requirements:

- University graduate in Information Technology or related disciplines. Candidate with certified PMP is highly preferred.
- A minimum of 10 years of experience in large scale IT project development, of which at least 5 years in the project manager or senior system analyst capacity
- **Financial industry exposure is a MUST**
- Good knowledge in application development tools such as VB, .Net, Java, Crystal Report and etc
- Excellent command of spoken and written English and Chinese. Mandarin skills will be an advantage

Candidates with less experience can be also considered as **Project Manager**.
