

Engineering Auditor, Based in Australia

- **World Class Mining Company**
- **Diversified Business Exposure**
- **Excellent Competitive Package and Bonuses**

Our client is a Multinational Mining Company with world class, large-scale projects in Asia Pacific. They are now looking for an experienced mining professional to make a difference to their business projects in Australia.

The incumbent will report to the Group Quality Director.

Responsibilities:

- Work in the Auditing team focusing on Safety and Operational Risk
- Planning, manage, execute and report on the operational audits
- Lead the team to evaluate the adequacy/effectiveness of internal controls, audit procedures, the mining and processing risks
- Involves construction of significant infrastructure and a large desalination plant.
- Carry out site visits and participate in advisory on ad hoc assignments as required

Requirements:

- Degree qualified in Mining Engineering or other relevant related fields
- Internal audit experience and qualifications in the QA/QC field are highly preferred
- Strong knowledge of open pit mining operations and downstream processing in the iron ore industry
- Possess excellent interpersonal and communication skills at all levels
- WA manual driver's license is essential
- Proficient both written and spoken in English and Mandarin
